

Innovative equipment and machinery made of stainless steel for municipal and industrial water and wastewater treatment

Competence in stainless steel - Leading in WWT

HUBER is a manufacturer of machines and plants for the water field. The HUBER Group is among the worldwide leading suppliers in the field of wastewater/sludge treatment and process engineering. On the basis of a more than 175 year commitment to drinking water and wastewater treatment HUBER has always been an innovator in this field with a continuous focus on the development of new solutions to conserve one of our most valuable resources: water.

Owned by the family since 1834, the company has developed to a state of the art manufacturer of equipments and solution supplier for all wastewater, production water and drinking water applications. HUBER processes only stainless steel for the production of machines and equipments and is certified by ISO 9001 and ISO 14000.

Huber offers municipally and industrial solutions for:

- Complete mechanical preliminary treatment,
- Screens for stormwater tanks with overflow,
- Screenings and grit treatment,
- Complete sludge treatment (screening, thickening, dewatering, drying)
- Wastewater filtration,
- Membrane technology
- Equipment for water supply and wastewater disposal facilities as manholes, object and property protection, drinking water reservoirs

As a pioneer HUBER established a lot of patented innovations worldwide whereas HUBER service comprises expert support.

With a total of around 900 employees HUBER was able to generate a turnover in excess of 125 million € for the business year 2008 in his headquarters of Berching, Bavaria.

HUBER installations are successfully operated on all 5 continents. More than 60 subsidiaries, offices and representations worldwide are available to perfectly meet the customer's specific requirements all over the globe.
