

Huber Technology, Inc. Recognized in the Charlotte Business Journal Fast 50 for 2011

HUNTERSVILLE, N.C., Dec 19, 2011 – Huber Technology, manufacturer of stainless steel municipal and industrial wastewater treatment equipment, was recognized as the 28th fastest-growing privately held company in the Greater Charlotte region by the *Charlotte Business Journal*. This distinction was announced at an awards luncheon on December 8, 2011 and was highlighted in a featured section of the December 9, 2011 issue of the *Charlotte Business Journal*.

The 3rd Annual Fast 50 awards program, presented by the *Charlotte Business Journal*, honors the fastest-growing private companies in the Charlotte, N.C. region for outstanding leadership as well as bringing best practices to the table in their respective industries.

Businesses qualified for Fast 50 recognition based on a formula that reflects dollar and percentage growth during a three-year period. Companies had to have annual revenue of at least \$1 million in 2010 and must be based in the 16-county Charlotte region.

“Recognition by the Charlotte Business Journal as a Fast 50 winner is a tribute to the strong, dedicated team at Huber Technology that has worked diligently to make the company one of the fastest growing private companies in the Charlotte region over the last three years,” said Dana Hicks, President of Huber Technology. “It is an honor for Huber Technology to be selected as a winner of the Fast 50 award and richly deserved recognition for the hard-working Huber team that has helped to drive the company’s strong sales growth over the last three years.”

Huber Technology has grown steadily since Huber SE, parent company of the Huber Group, opened the subsidiary in the United States in 1999. The continuation of this growth is evidenced by the 29% CAGR from 2008-2011.
