HUBER wins German DWA Championship 2014 in wastewater technology

07.05.2014

HUBER Technology Service has won the Open National Championship for sewage treatment professionals organised by the German Water, Wastewater and Waste Association (DWA).

The competition took place during IFAT 2014 on the trade fair grounds in Munich. HUBER Technology Service competed as an industrial enterprise against the professionals from seven European sewage treatment works. The participants in the competition had to master demanding challenges in the field of measuring & control technology as well as complete sewage treatment works control with process technology. Moreover, they had to complete the tasks within a strict time limit.

Our Service team showed high competence, worked systematically and with concentration, going for the win right from the beginning:

Congratulation to Markus Schober, Martin Wild und Sebastian Jürgens, who have impressively proven and demonstrated to the public the superior competence of HUBER Service in direct competition with professionals from very renowned and large national and international sewage treatment plants!

This is what we need to permanently further develop our service performance on an international scale.

Our photo shows the 3 champions together with CEO Georg Huber, head of HUBER Global Service Paul Neumaier, Operative Service Group Manager and competition team coach Kai Höhler.

HUBER Technology Service: German DWA Champions in wastewater technology

*The competitions:
Sewage treatment plant process technology and measurement & control technology on a sewage treatment plant*
