## Our Parent Company

*HUBER headquarters and factory in Berching, Germany*

Huber Technology Inc. is the North American member of the HUBER group. Our parent company, Huber SE, is based in Germany, in the State of Bavaria.

The company has been owned by the Huber family for over 175 years. With its more than 60 subsidiaries, offices and partnerships worldwide, the company is a market leader in wastewater/sludge treatment. The HUBER group, with approximately 1,300 employees world-wide, has revenues of well over \$ 200 million.

HUBER has always been an innovator in the field of drinking water and wastewater treatment with a continuous focus on the development of new solutions to conserve one of our most valuable resources: water.

The products have been developed in cooperation with the customer and for the customer. Our fundamental goal has been to offer equipment with the same life span as the concrete plant it is installed. This is the reason why we make virtually all our equipment of stainless steel.

The headquarters and factory have been located in Berching for over 175 years. Berching is about 80 miles North of Munich. The small town is surrounded by the beautiful forests of the Altmühl Valley and is connected through the Rhein-Main-Donau Canal to both the North Sea and the Black Sea. Berching looks back on a history of over 1,100 years; it is still enclosed by its medieval town wall and gate towers.

You will find more information about our parent company at their corporate website [www.huber.de](http://www.huber.de).
